

We just improved on perfection.

Introducing the ultimate zinc barrel plating line:

THE BEAR

Why would you *possibly* trust your plating to anyone else?

PLATECO[®]
PLATING PERFECTION[™]

In times like this, you need a plater you can trust.

That's why we just made a huge investment in **THE BEAR**, our new barrel electroplating line that increases our industry-leading speed by 20% and our large load drying capacity by 4X!

In addition, **The Bear** gives us an unmatched ability to thoroughly dry challenging flat, nesting, and internally threaded parts, and more cleaning capacity for even more amazing plating quality.

It's also why we recommend having all of your parts plated by the **ONLY** zinc plating company that checks ALL of these boxes:

- ✓ Fully automated lines - virtually eliminating human error
- ✓ Tightly engineered plans for every single part - further reducing the risk of error
- ✓ Ability to run 3 hoists at a time - for faster cycle times and shorter lead times
- ✓ An unequaled 15 plating stations per cycle for thicker zinc coating capability
- ✓ Custom packaging capability on every part we plate
- ✓ **AN UNHEARD-OF 0.25% RETURN RATE**

DO THE MATH:

Fewer returns + faster lead times = unmatched value!

Put us to the test!

Let us pick up and plate - FREE of charge - a sample of your most difficult part and we'll show you what we mean by plating perfection.
